

Fri, 07 Dec 2018 11:57:00 GMT epidemiology 101 text only 1st pdf - Measles is a highly contagious infectious disease caused by the measles virus. Symptoms usually develop 10-12 days after exposure to an infected person and last 7-10 days. Initial symptoms typically include fever, often greater than 40 °C (104.0 °F), cough, runny nose, and inflamed eyes. Small white spots known as Koplik's spots may form inside the mouth two or three days after the start ...
Thu, 06 Dec 2018 20:26:00 GMT Measles - Wikipedia - Acid throwing, also called an acid attack, a vitriol attack or vitriolage, is a form of violent assault defined as the act of throwing acid or a similarly corrosive substance onto the body of another "with the intention to disfigure, maim, torture, or kill". Perpetrators of these attacks throw corrosive liquids at their victims, usually at their faces, burning them, and damaging skin tissue ...
