Mathematical Sciences - Why do we think we're so bad at maths, when we're all - almost all - born with brain circuits specialised for numbers? Our ability to use numbers has been the key from taking us from the Stone Age to the Phone Age. Trade, science and technology would be impossible without this ability. Neuroscientist Brian Butterworth argues that we are all born with brain circuits specialised for numbers. Sun, 02 Dec 2018 18:58:00 GMT

viXra.org e-Print archive, Mathematical Physics - Why a Scientific Format? The scientific format may seem confusing for the beginning science writer due to its rigid structure which is so different from writing in the humanities. One reason for using this format is that it is a means of efficiently communicating scientific findings to the broad community of scientists in a uniform manner. Tue, 04 Dec 2018 19:17:00 GMT

In February 1951 a fully engineered version, the Ferranti Mark 1, came into operation. The result was that Alan Turing was in the one place in the world where he could enjoy the personal use of a computer to work on his new theory of life.
